

The 8th National Conference on Landscape Architecture

การประชุมวิชาการด้านภูมิสถาปัตยกรรม ครั้งที่ 8

Call for Abstracts

“Landscape et al. (2025)”

This theme invites exploration of the multifaceted dimensions of landscapes and their integral role in shaping social, environmental, and economic dynamics. By using "et al.," the theme underscores inclusivity and interdisciplinarity, reflecting the expansive and interconnected nature of landscapes and their impact on various spheres of human and ecological systems.

Key Dimensions of the Theme

1. Social Perspectives

o Cultural Landscapes

Understanding landscapes as cultural symbols, shaped by human activity and heritage.

o Community and Well-being

Exploring how landscapes contribute to mental health, recreation, and the creation of vibrant, inclusive communities.

o Urban and Rural Interactions

Examining how landscapes mediate the relationship between urbanization and rural preservation.

o Equity and Access

Addressing issues of social justice in the design, maintenance, and accessibility of public landscapes.

2. Environmental Perspectives

- **Climate Resilience**
Investigating the role of landscapes in mitigating climate change, such as through green infrastructure and carbon sequestration.
- **Biodiversity and Conservation**
Highlighting landscapes as habitats for flora and fauna and their role in preserving ecological diversity.
- **Ecosystem Services**
Understanding landscapes as providers of essential services like air purification, water management, and soil fertility.
- **Nature-Based Solutions**
Showcasing innovative landscape designs that tackle environmental challenges such as urban heat islands and flooding.

3. Economic Perspectives

- **Sustainable Development**
Examining how landscapes can support economic growth while ensuring environmental sustainability.
 - **Tourism and Local Economies**
Exploring landscapes as drivers of ecotourism and community-based tourism initiatives.
 - **Green Investments**
Highlighting opportunities for funding and policy incentives that support the development of sustainable landscapes.
 - **Valuation of Ecosystem Services**
Quantifying the economic benefits derived from healthy and well-maintained landscapes.
-

รูปแบบการนำเสนอ

นำเสนอผลงานด้วยวาจา (Oral Presentation)
